# **ONBOARD INNOVATIONS**

**NEW SOLUTIONS. SMARTER PERFORMANCE.  
SUSTAINABLE COMFORT.  
2026**

# MOBILE LIVING MADE EASY.

**Dear Freedom Lover,**

Across the world, Dometic powers life on the water. From dayboats to superyachts, our systems are built to keep you comfortable, confident, and in control - wherever your next horizon lies.

Innovation is at the helm of everything we do. From advanced climate solutions to efficient refrigeration, steering, sanitation, and stabilisation systems, each product in this catalogue represents progress toward smarter, cleaner, more connected boating.

As marine technology evolves, so do we. Our commitment to sustainable materials, efficient energy use, and next-generation refrigerants ensures that your comfort never comes at the cost of the environment.

This catalogue is more than a collection of products, it's a glimpse into the future of onboard living. Discover what's new, what's next, and how Dometic continues to redefine marine living made easy.

# DOMETIC DG3 GYRO STABILIZER

Enhancing user comfort through a wider range of conditions and extending overall time spent on the water, DG3 utilizes the latest technology to provide a premium stabilization experience.

**INDUSTRY LEADING**  
FIRST ACTIVE GYRO FOR THE  
RECREATIONAL MARKET

**FUTURE-PROOF DESIGN**  
ALL ELECTRIC PRECESSION  
ACTUATOR

**MAINTENANCE FREE**  
ROBUST BEARINGS AND  
SUPERIOR COOLING

# UNPARALLELED EFFICIENCY

Introducing the first truly active gyro on the recreational market, DG3 boasts industry-leading spin up and down times, coupled with a remarkable 40% reduction in power consumption to nearest competitor model.

DG3 is compatible with 12, 24, or 48V systems and connects seamlessly to multi-function displays via a simple Ethernet connection. DG3 is virtually maintenance free, with the elimination of hydraulics, incorporation of a titanium heat exchanger, and utilizing sealed needle bearings where bushings are traditionally used, ensuring durability.

## KEY BENEFITS WITH DG3 GYRO

- Industry leading Spin Up/Down Time
- All electric precession actuator technology
- Dynamic Precession - Ability for the electric precession actuator to adapt to the sea state
- First truly active gyro on recreational market
- 40% reduced power consumption
- 12, 24, or 48V compatible
- Simple Ethernet connection to MFD
- No hydraulics
- Titanium heat exchanger
- Improved cooling for longer bearing life

### 1. Advanced Bearing Life

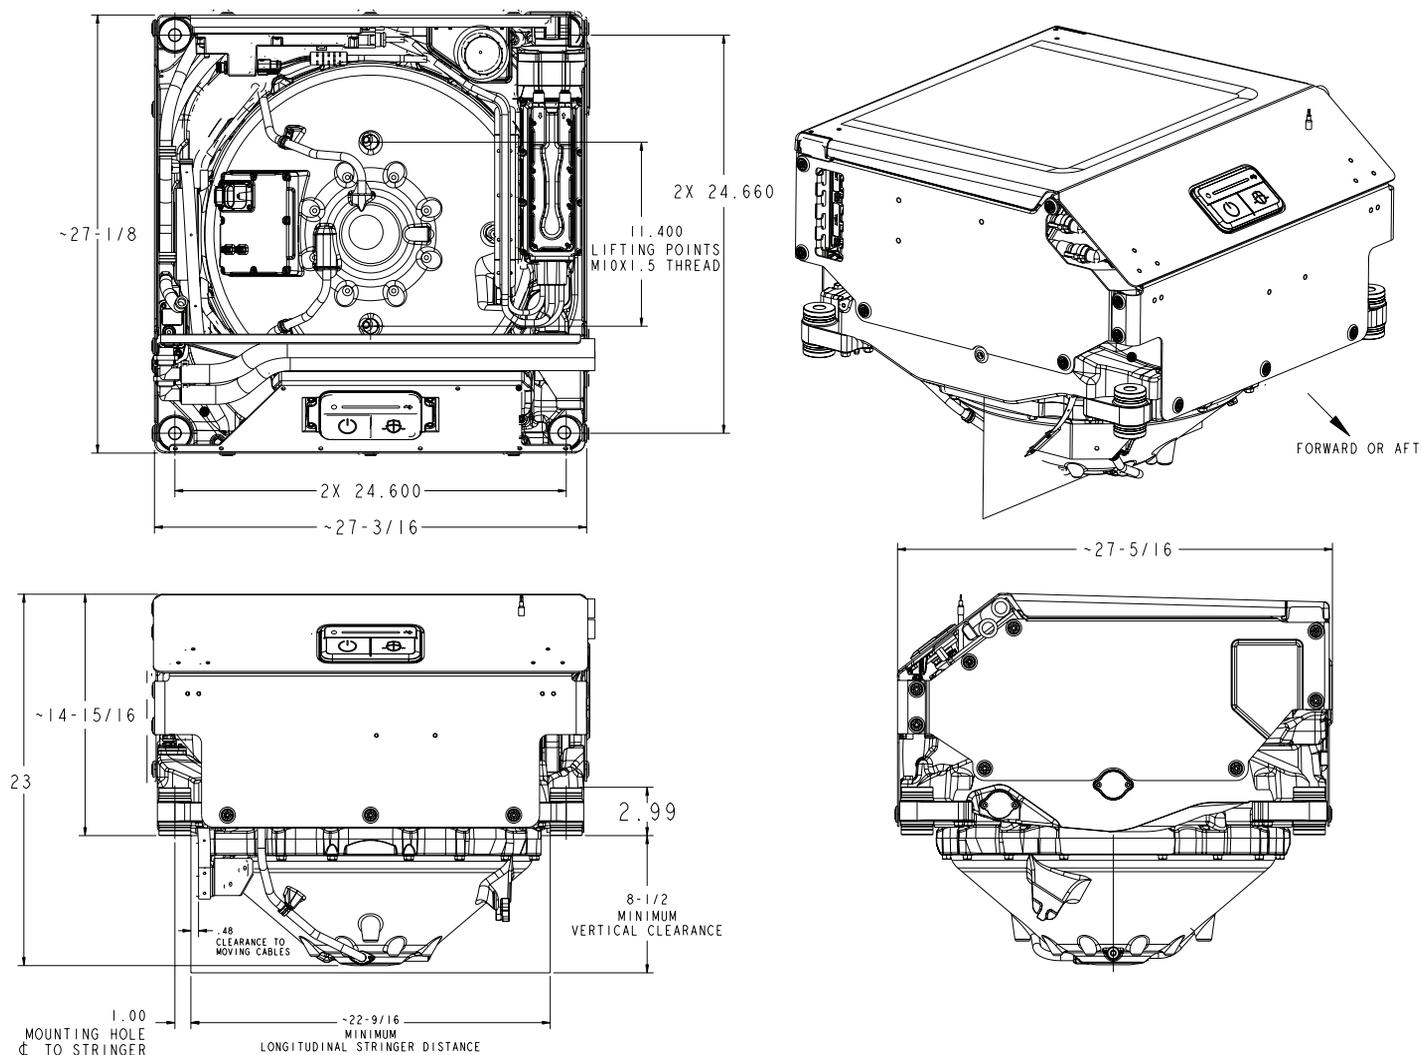

Achieved through the use of larger bearings, bearing configuration, and better cooling methods.

### 2. Electric Precession Actuator

All electric precession actuator eliminates hydraulics and responds to a wider range of sea conditions

# PRODUCT DIMENSIONS

# TECHNICAL INFORMATION

DOMETIC DG3 GYRO STABILIZER	
Operating Speed	4700 RPM
Angular Momentum at Operating Speed	3,000 N-M-S
Max Anti-rolling Torque at Operating Speed	8,000 N-M
Spool-up Time to Operating Speed	16.5 minutes (4,700 RPM)
Spool-up Time to Stabilization	9.5 minutes (2,720 RPM)
Spin-down Time	16.5 minutes
Operating Power @ 12V	260-750 Watts (Sea State dependent) [22 - 63A]
DC Power Input	12, 24, or 48VDC
48V Spin Battery (Included)	10.2L x 7.1W x 10.8H (inches)
Weight	580 LBS (263.04 KG)
Envelope Dimensions	27.1 L x 27.2 W x 23 H (inches)
	0.688 L x 0.690 W x 0.584 H (meters)
Noise Output	<72 dBC at 1 meter
Seawater Supply to Heat Exchanger	2 GPM (7.6 LPM) minimum
	6 GPM (22.7 LPM) maximum

CONNECTIONS	
Power	4x M8x1.25 studs
CAN communication	M12 5-way male keyed 'A'
Ethernet communication	M12 4-way female keyed 'D'

ENVIRONMENTAL	
Operating Temperature	32° - 140° F (0° - 60° C)
Water ingress protection	IP67

WARRANTY	
Warranty Period	3-Year/ 3000hr standard warranty

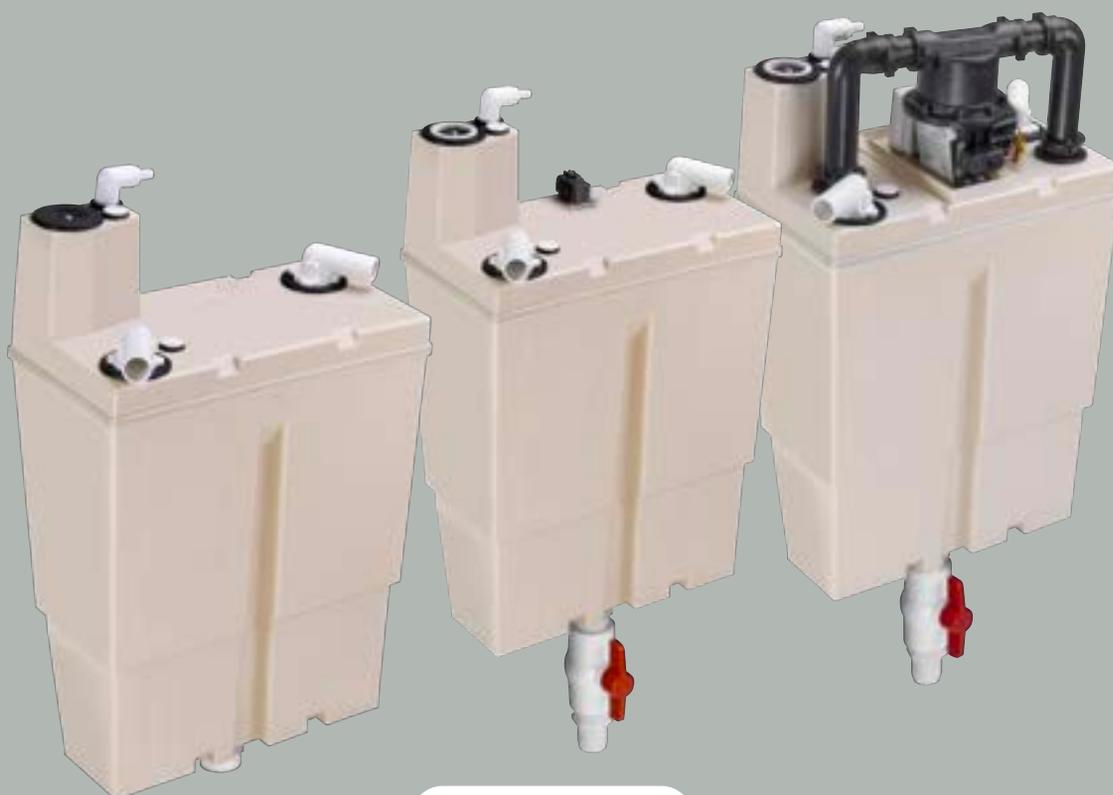

# DOMETIC W-SERIES WALL HOLDING TANKS

Experience Dometic's Wall Tank Series for marine waste holding tank applications. It's corrosion-proof, odor free and built with high-strength ABS for long-lasting durability. The HTS-W model with intergrated VacuMax pump provides the power of vacuum to save water with every flush. Multiple discharge outlets eliminate the need for complex plumbing. Basic tank design models offer boat builders flexibility when planning vessel layouts and toilet technologies.

**ODOR FREE**  
FULLY SEALED AND  
FACTORY-TESTED

**EASY TO INSTALL**  
PRE-PLUMBED AND  
READY TO GO

**TECHNOLOGY FLEXIBLE**  
BASIC AND VACUMAX  
INTEGRATED MODELS

# COMFORT & SUSTAINABILITY IN HARMONY

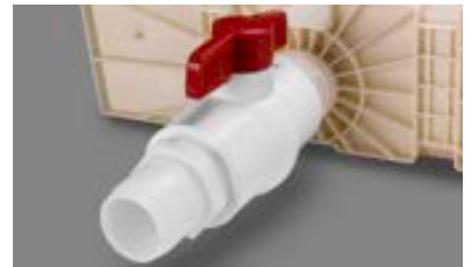

## 1. Innovative Tank Design

Internal paddle ribs strengthen the tank, mix contents through vessel movement, and help break down solids - all with no moving parts.

## 2. Integrated Strap Mounts

Ensures consistent tank securing from top to bottom.

## 3. Gravity Drain System

Includes a ball valve and hose fitting to reduce standing sewage, minimise odour, and extend hose life.

## 4. Tank Status Panel

Illuminates at 75% capacity to prevent overfilling.

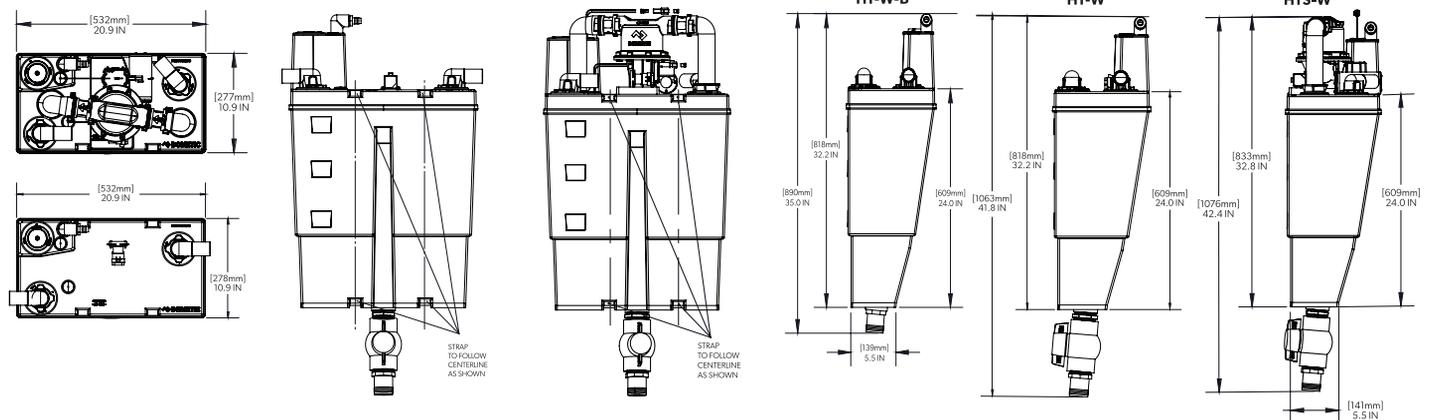

## 5. Inverted Vacuum Pump

Resets vacuum in just 20 seconds, offering easier servicing, reduced maintenance, and extended life.

## 6. Optimised Vacuum Reservoir

Precision geometry boosts pump efficiency, prevents buildup, and ensures sealed reliability.

# GVTX 48VDC BATTERY-POWERED HVAC

Engineered for efficiency, built for battery-powered freedom.

**DIRECT 48VDC INPUT**  
NO CONVERTERS NEEDED

**SMART BATTERY MONITORING**  
PREVENTS POWER DRAIN

**FULL VARIABLE TECHNOLOGY**  
MAXIMIZES ENERGY EFFICIENCY

# G-SERIES GVTX VARIABLE CAPACITY SELF CONTAINED SYSTEM

The GVTX 48VDC is a next-generation HVAC system designed for electric and hybrid vessels. Built on the GVTX platform, it delivers efficient, intelligent performance in a compact, service-friendly form.

Powered directly by 48VDC, it eliminates the need for AC-DC converters, boosting efficiency and simplifying installation. Its variable capacity compressor adjusts output to real-time demand, reducing power draw.

An integrated battery monitoring system protects against over-discharge for longer, safer off-grid operation. Sharing its platform with the high-voltage version, GVTX streamlines manufacturing and service while offering quiet, modular comfort for a wide range of vessels.

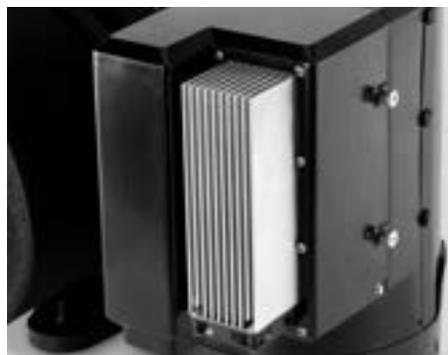

## Benefits with GVTX 48V

- Direct 48VDC input
- R454B Low GWP refrigerant
- Variable capacity compressor
- Titanium condenser coil
- BLDC high velocity rotatable blower
- Reverse cycle heat
- Composite positive flow condensate pan
- Standard sound cover
- No starting amperage
- Built in network hardware NEMA2000
- Electric box can be remote mounted
- CE compliant

### Variable Capacity

GVTX variable capacity unit available in two size options that will provide cooling from 10,000BTU to 18,000BTU.

### Direct 48VDC input

Operates directly from 48V battery bank with no adapters required

### Titanium Condenser

Robust Design.

# INDEPENDENT CONTROL FOR PERSONAL COMFORT

The VMD 2.5 Display is the intelligent control interface at the heart of Dometic's marine HVAC systems. Engineered for simplicity and precision, it allows boaters to monitor and manage onboard comfort with ease, from temperature and fan speed to energy-saving and sleep functions.

Designed for seamless integration across Dometic's latest HVAC platforms, the VMD 2.5 combines intuitive navigation with advanced performance features to enhance both efficiency and experience on board. Each function has been developed to meet real-world needs at sea - whether reducing energy draw through Eco Mode, ensuring restful nights with Quiet Mode, or automating operation through Scheduling and Zoning.

Its bright, clear display and modern interface make adjustments effortless, even in challenging lighting conditions. Built for reliability and compatibility over the NMEA 2000 network, the VMD 2.5 gives you complete climate control, all from a single, easy-to-use screen.

## Benefits with VMD 2.5

- Eco Mode reduces power draw for longer runtime and improved efficiency
- Quiet Mode limits fan speed for low-noise operation and consistent comfort
- Scheduling allows automatic temperature and mode adjustments by time and day
- Zoning enables control of multiple units from a single display via NMEA 2000
- Clear, user-friendly interface for quick setup and operation
- Simple navigation through dedicated Functions and Parameters screens
- On-screen icons provide visual confirmation of active modes

# FRESHJET FJX7 3500 ROOFTOP AC

Built on the high-performance platform of the FJX7 3500, this marinised roof air conditioner delivers rapid cooling, whisper-quiet operation, and uncompromising durability, now optimised for life at sea. Designed to resist saltwater corrosion and withstand shock and vibration, it keeps your vessel cool, clean and comfortable in all conditions.

**TESTED MARINE  
GRADE QUALITY**

**DROP-IN DESIGN  
READY TO INSTALL**

**FUTURE READY  
TECHNOLOGY**

# EFFORTLESS COOLING MARINE READY

The FreshJet FJX7 3500 Marine Edition combines the latest inverter compressor technology with a robust marinised design. From tropical anchorages to turbulent crossings, it performs reliably and efficiently, thanks to its smart airflow distribution, corrosion-resistant construction, and low-vibration layout.

Compact and aerodynamic, it installs easily on any motor yacht or cruiser over 8m. Pair with the FJX ADBD air distributor box for touch control, LED lighting, and a refined interior finish.

## Benefits with FJX7

- Marine-grade stainless and coated components ensure lasting corrosion protection.
- Inverter compressor delivers rapid, whisper-quiet cooling with exceptional efficiency.
- Intuitive climate control via the sleek ADBD touch panel or included remote.
- Integrated CleanAir system helps neutralise odours and maintain cabin freshness.
- Designed to fit standard 400 x 400 mm openings and 25–60 mm roof thickness.
- Seamless connectivity with the Dometic Climate app for smart onboard control.

<b>REFRIGERATION TECHNOLOGY</b>	Inverter Compressor
<b>REFRIGERANT TYPE</b>	R32 (650 g)
<b>AIR FLOW</b>	Up to 350 m <sup>3</sup> /h (with ADBD)
<b>TEMPERATURE CAPABILITIES</b>	Cooling & Heating (Exact Temperatures Range by Installation Environments)
<b>INPUT VOLTAGE</b>	220 – 240 V AC / 50-60 Hz
<b>ROOF THICKNESS COMPATIBILITY</b>	25 - 60 mm
<b>MOUNTING OPENING</b>	400 x 400 mm
<b>WEIGHT</b>	Approx. 39 kg
<b>INCLUDED</b>	FJX7 3500 Rooftop Unit Remote Control
<b>OPTIONAL</b>	FJX ADBD Air Distribution Box

### 1. Marine-Optimised Durability

All metal parts are stainless steel or coated, with salt-spray-tested components built to resist marine corrosion.

### 2. Advanced Cooling Performance

Inverter-driven compressor ensures efficient performance in any climate - quiet, powerful, and precise.

### 3. CleanAir Filtration

An integrated purifier system helps keep cabins fresh and odour-free, ideal for long stays onboard.

### 4. Sleek, Space-Saving Design

Low-profile rooftop unit with aerodynamic styling and LED lighting makes a premium design statement.

### 5. Intelligent Control Options

Add the FJX ADBD for fingertip control via digital panel or smartphone app – intuitive and stylish.

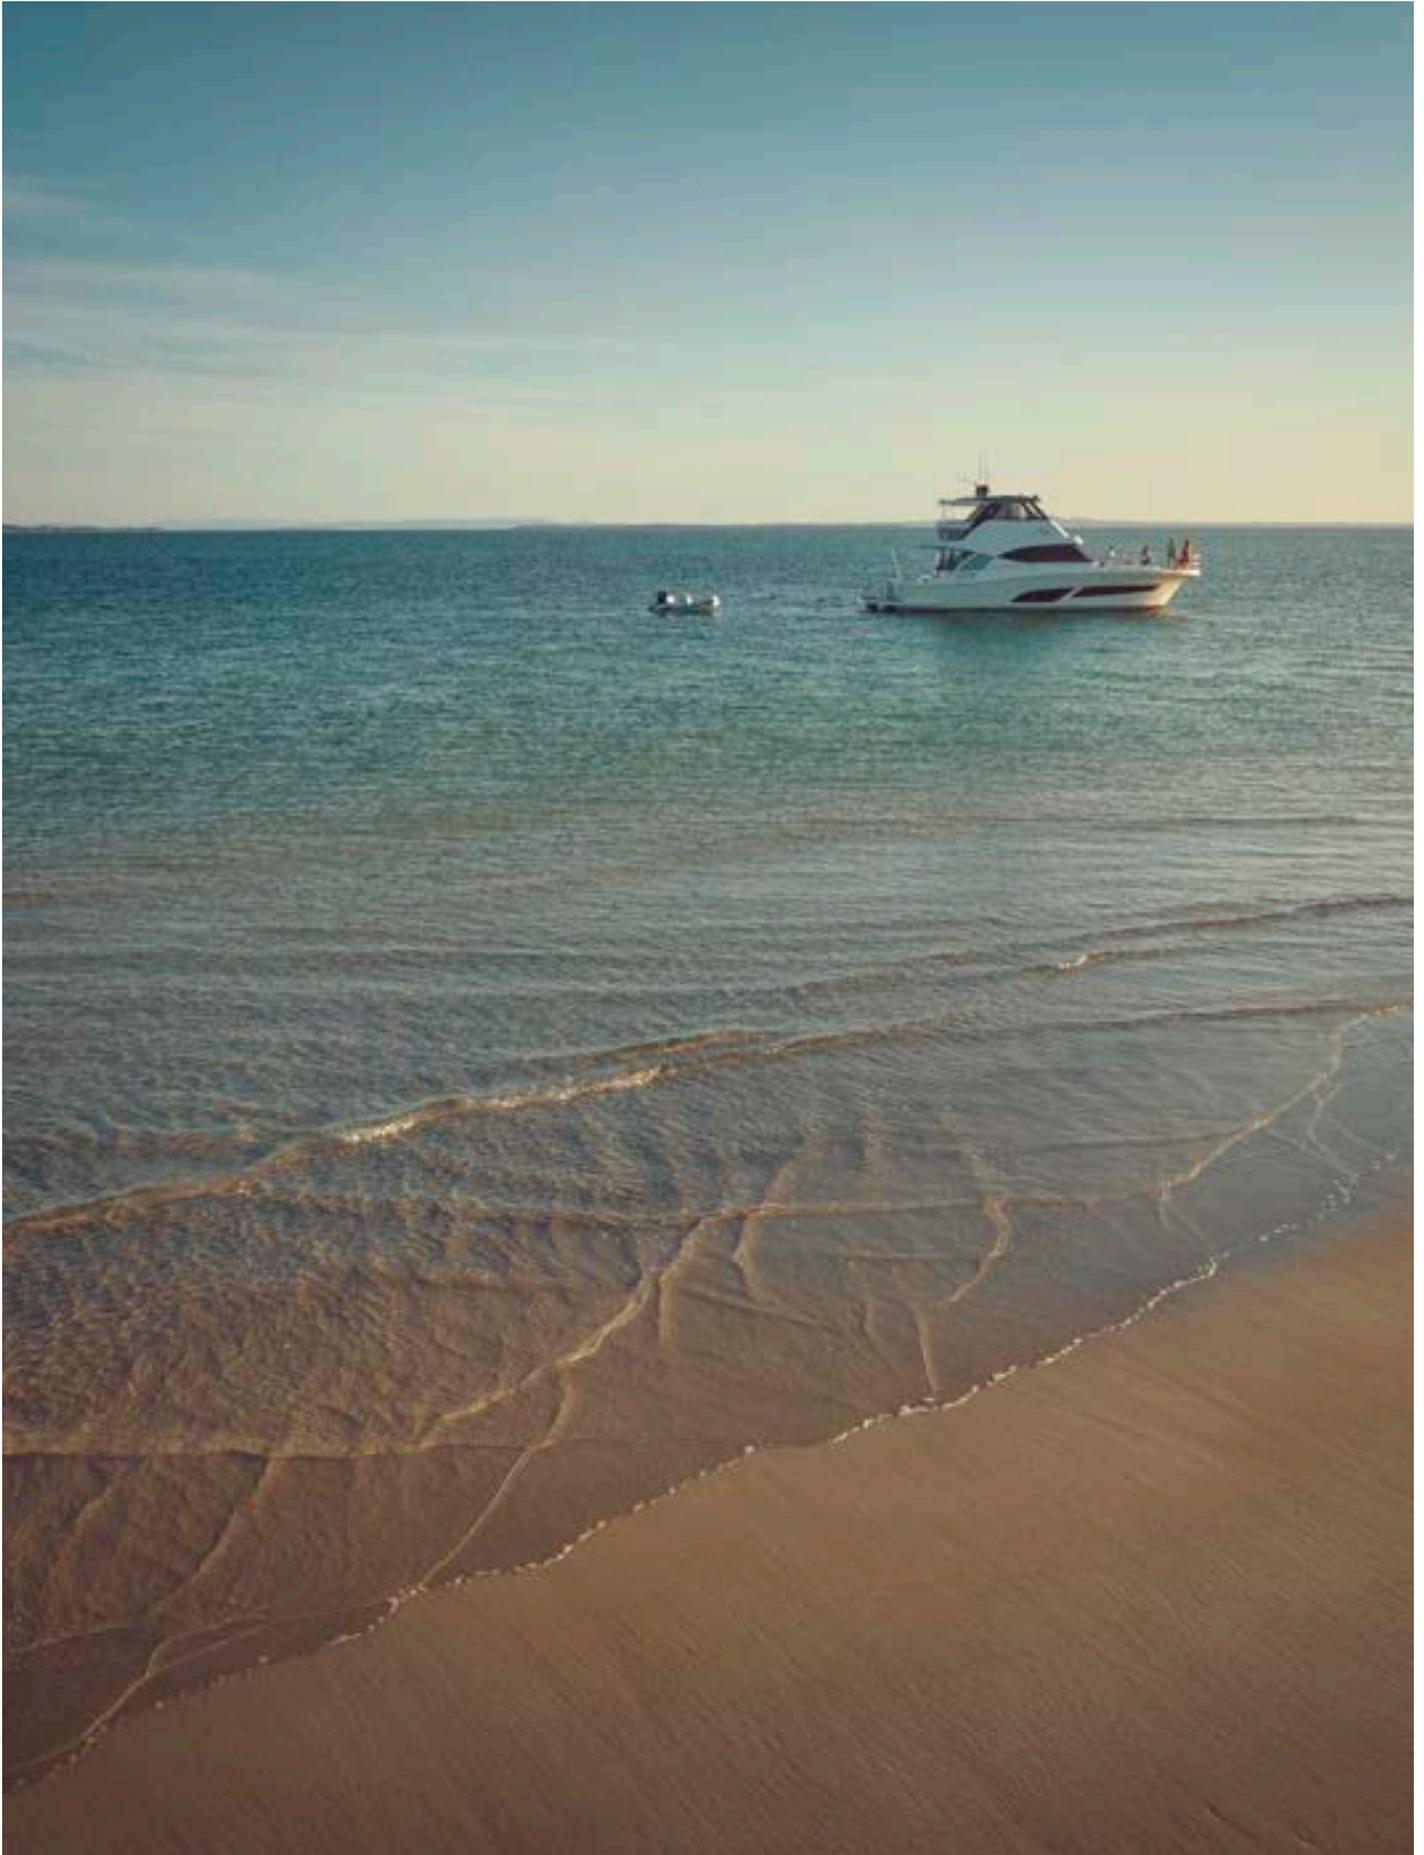

### 6. Easy to Fit & Maintain

Simple 400 x 400 mm installation, removable dust filter, and marine-grade robustness make ownership easy.

Unit Weight (kg)	38.9
Remote Control	Included
Air Distributor Box	FJX ADBD (9600051008)
Box Dimensions (W x H x D mm)	579 x 48 x 518
Box Weight (kg)	3.9
Air Flow (m <sup>3</sup> /h)	350
Test Marks	E-approved to EMC / Marine Directives (Pending)

# OPTIMUS COMPACT HELM

The new Optimus Compact Helm is redesigned from the ground up to make installation faster, simpler, and more efficient, without sacrificing the performance Optimus is known for. By combining the helm and tilt mechanism into a single front-dash unit, it's half the size of the previous design, freeing up valuable space and reducing install time.

Paired with Optimus Link, setup is easier than ever. Smooth steering, adaptive control, and fault-tolerant reliability come standard, making this the helm built for today's boats and tomorrow's expectations.

## COMPACT DESIGN

HALF THE SIZE. SAME POWER.  
CLEAN, SIMPLE DASH

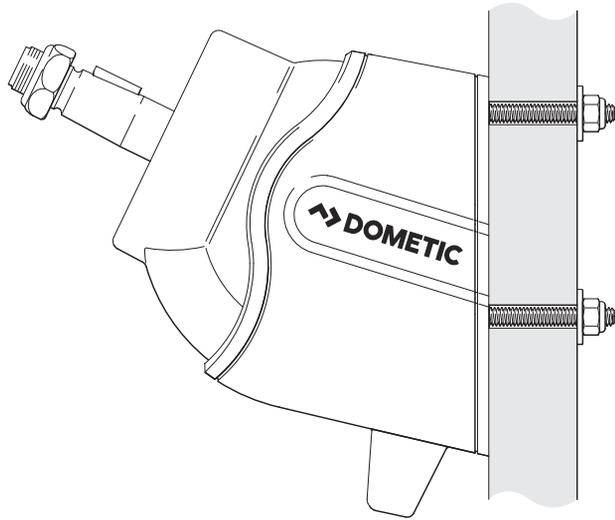

## EFFORTLESS INSTALL

ONE FRONT-MOUNTED UNIT +  
OPTIMUS LINK FOR A FASTER,  
CLEANER INSTALL

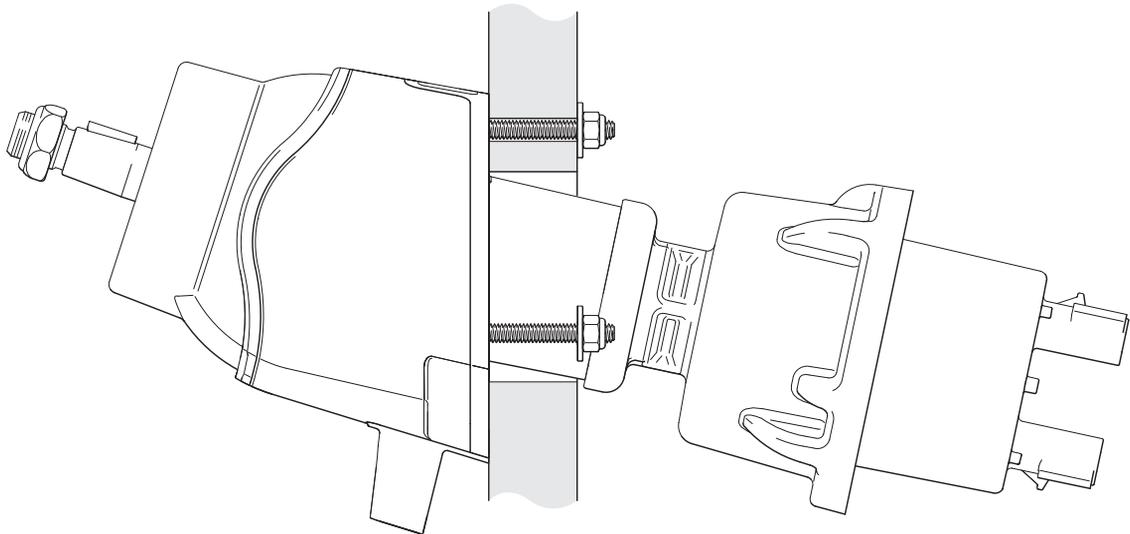

## TRUSTED PERFORMANCE

SMOOTH, ADAPTIVE STEERING.  
PROVEN RELIABILITY

NEW STYLE COMPACT TILT HELM

CURRENT EPS SPORT PLUS TILT HELM (EH1532)

# OPTIMUS ELECTRIC STEERING ACTUATOR WITH OPTIMUS LINK

The Optimus Electric Actuator provides a low-maintenance, reliable alternative to traditional hydraulic steering, offering smooth and easy control. It works seamlessly with advanced systems like Seaways autopilot, Optimus 360 Joystick, and SeaStation virtual anchor. When paired with the Optimus Link, a streamlined, cost-effective alternative to the color display, it makes electric steering more accessible, ensuring precise handling and enhanced control on the water.

**HIGH PERFORMANCE**  
COMPACT DESIGN

**INTEGRATED ELECTRONICS**  
FULLY POTTED

**REDUCED MAINTENANCE**  
NO HYDRAULIC FLUID

# NEXT GENERATION ELECTRONIC POWER STEERING

The Optimus Electronic Steering Actuator is the first complete bolt on electronic steering for outboard engines, compatible for twin, triple and quad engines 150 horsepower and up.

The steering control unit, hydraulic power source and transmission and actuator are integrated into one electro-mechanical actuator, making this the next evolution in electronic power steering.

## Benefits with Optimus EPS

- Optimus standard for SeaStation and SeaWays
- Substantial similar in size to the tournament Optimus cylinder
- Optimus standard for Tournament Tie Bar
- Optimus standard link for autopilot (garmin, simrad, raymarine)
- Auto-adjusting turns lock to lock based on RPM
- Auto adjusting wheel effort based on RPM
- Ackerman (ideal for pontoon and catamarans)
- Set the rudder angle at low and high speed for safe vessel steering
- Compact Roller Screw Technology
- NMMA, ABYC, CE, ISO and SAE electrical & environmental requirements

### 1. Easy Installation

Customer installable molded harness

### 2. Worry-Free Compatibility

Compatible with Optimus 360 Joystick Control as well as SeaStation (GPS Anchor) and SeaWays (built-in autopilot)

### 3. Durable Design

Ultra corrosion-resistant shafts

# OPTIMUS LINK

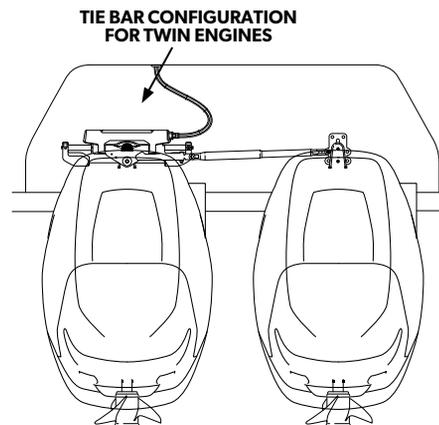

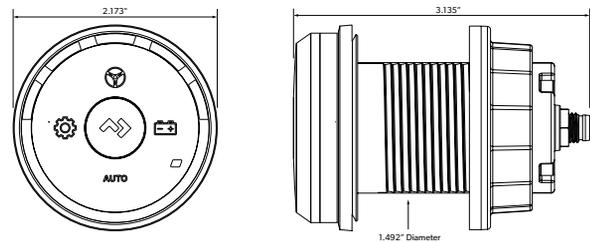

The new Optimus Link UI introduces a refined design that occupies less dash space, creating a clean, organized dashboard layout. This minimalist look complements any vessel's interior, while enhancing usability with intuitive controls.

Offered as a lower-cost alternative to the color display, the Optimus Link UI makes electronic power steering more accessible than ever. Experience all the benefits of electric steering that the market has trusted for over a decade at a reduced price, without sacrificing quality or functionality.

## Features

- **Minimalist Design:** Clean, unobtrusive interface that seamlessly integrates with your dash.
- **Space-Saving:** Compact footprint ensures easy fitment.
- **Rapid Setup:** System setup and calibration in just 10 seconds upon first power-up.
- **Built-In Diagnostics:** Includes a system diagnostic feature to assist with troubleshooting.

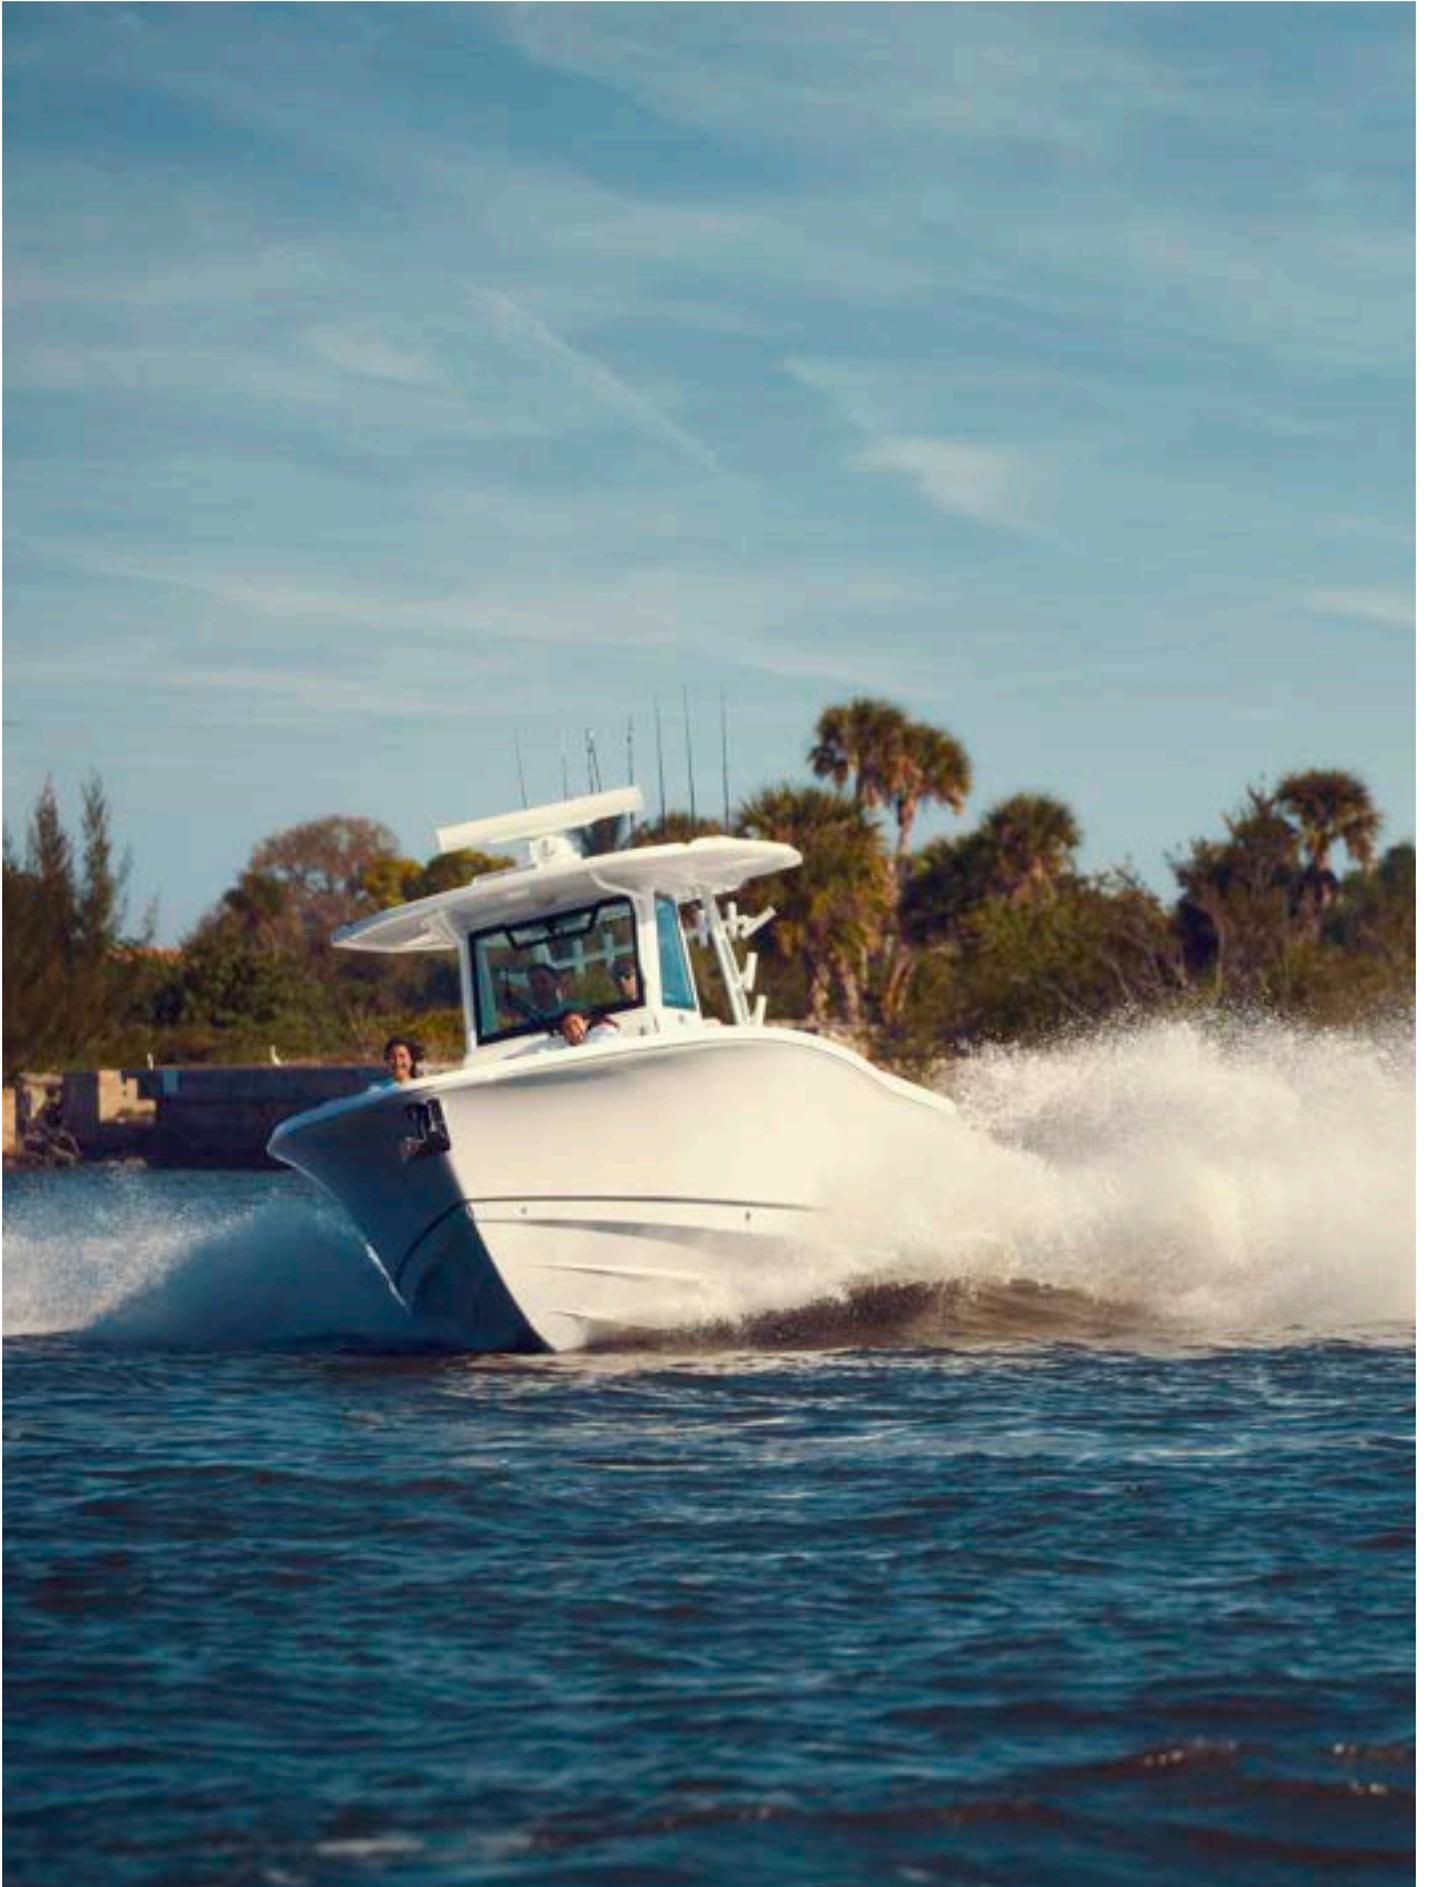

### 1. Compatibility

Compatible with Optimus Electric Actuator in single-engine or twin-engine tie bar configurations

### 2. Future-Proof And Upgradeable

Upgradeable to advanced features like the Optimus 360 joystick, Seaways autopilot, or Optimus color display, ensuring your system can evolve with your needs

# DOMETIC COLDMACHINE CSX

The all-in-one upgrade for marine refrigeration. The Dometic CSX delivers next-generation cooling performance in a compact, integrated design. With precision temperature control, fan-assisted cooling and ultra-efficient, low-GWP refrigerant, it's built to keep food and drinks fresher for longer - no matter where you sail.

**ALL-IN-ONE DESIGN**  
FULLY INTEGRATED

**FAST, EVEN COOLING**  
FAN-ASSISTED AIRFLOW

**PRECISION CONTROL**  
NTC SENSOR

# COOL SMARTER EXPLORE MORE

The Dometic CSX is a self-contained cooling system engineered for effortless installation and reliable performance. Ideal for volumes between 50 and 400 L, it combines a high-efficiency compressor, fan-cooled evaporator and digital temperature control in one space-saving unit. Simply drop it in, connect power, and enjoy consistent cooling without the complexity of remote couplings. With low-GWP refrigerant\*, reduced power draw and a durable marine-ready build, the CSX is the smarter way to keep provisions fresh - whether you're coastal cruising or voyaging offshore.

## Benefits with Dometic CSX Series

- Integrated compressor and evaporator for easy drop-in install
- Fan-assisted airflow reduces cool-down time and maintains even temperature
- Digital temperature control with high-accuracy NTC sensor
- Up to 20% lower power consumption vs. previous models
- Low-GWP refrigerant\* (R1234yf) for reduced environmental impact
- Built-in LED compartment lighting for better visibility
- Compact footprint for space-restricted galleys or boxes
- Available in refrigerator or deep-freezer versions
- Electronic control with automatic defrost logic

\*GWP = Global Warming Potential refers to the global warming potential should a gas be emitted into the atmosphere. The higher the GWP value, the more harmful the gas's impact on the environment.

## Specifications

# DOMETIC COLDMACHINE CX & VX

The Dometic CX & VX range offers flexible, high-performance refrigeration tailored to your onboard needs. With a wide choice of evaporators and compact condensing units, it's easy to configure the perfect cooling setup, whether you're upgrading an existing box or fitting out a new build.

**MODULAR SYSTEM**  
FLEXIBLE INSTALLATION

**VOLUME OPTIONS**  
FROM 50L TO 600L

**MODERN DESIGN**  
STYLE MEETS EFFICIENCY

# CUSTOM COOLING YOUR WAY

The Dometic CX & VX series delivers tailored cooling power for every boat and every box. With compact condensing units and versatile evaporators, the system adapts seamlessly to volumes from 50 to 600 L. Precision digital control, reliable quick-connect couplings and low-GWP refrigerant\* make installation simple and performance dependable. Whether for a compact galley fridge or a high-capacity fish box, CX & VX gives you the flexibility to design refrigeration that's as individual as your voyage.

## Benefits with Dometic CX & VX Series

- Flexible combinations of condensing units and evaporators to suit boxes from 50 - 600 L
- Reliable quick-connect couplings for fast, secure installation
- Compact compressor units designed for tight marine spaces
- Modern roll-bond evaporators with clean faceplate design for seamless integration
- Precision digital temperature control with high-accuracy NTC sensor
- Energy-efficient performance with low-GWP refrigerant\* (R1234yf)
- Suitable for both new builds and retrofit upgrades
- Multiple evaporator formats (flat, O-box, fan-cooled, freezer) to match any compartment

## Specifications

<b>VOLUME RANGE</b>	50 - 600 L (depending on CX unit and VX evaporator pairing)
<b>REFRIGERANT</b>	R1234yf

# EFFORTLESS DESIGN, EXCEPTIONAL PERFORMANCE

The NRX Drawer Fridge combines smart design with ultimate practicality. Its frameless door and full-width handle bring modern style, while the slide-out drawer makes accessing your provisions simple and hassle-free. Inside, the modular layout adapts to your needs, and the removable freezer compartment creates extra space for taller bottles or larger items in seconds.

Built for efficiency, the NRX is up to 20% more energy-efficient than comparable fridges, with an electronically controlled compressor and fan speed for quiet, economical operation. Whether you're chilling drinks or deep-freezing essentials, the NRX is the perfect balance of style, performance, and practicality.

<b>REFRIGERATION TECHNOLOGY</b>	Compressor
<b>REFRIGERANT TYPE</b>	R600a
<b>TEMPERATURE RANGE</b>	12°C to 0°C Fridge -5°C to -15°C Freezer
<b>INPUT VOLTAGE</b>	12/24 V DC
<b>INCLUDED</b>	Wire Basket x 1 Horizontal Divider x 1 Vertical Divider x 1 Upper Door Tray x 1 Removable Freezer Compartment x 1

## Benefits with NRX Series

- Customizable Storage: Modular interior with adjustable partitions and versatile storage trays.
- Convenient Slide-Out Design: Smooth, self-closing drawer with easy access from any angle via a full-width handle.
- 3-in-1 Cooling Solution: Use as a fridge-freezer combination, or remove the freezer compartment for full fridge or freezer capacity.
- Elegant Front Panel Options: Frameless door available in dark silver or stainless steel finishes.
- Energy-Efficient Performance: Premium variable-speed compressor with Eco, Performance, and Silent modes.
- Secure and Practical Features: Two-point locking system (NRX-S only) with winter ventilation mode and optional modular installation frame.

### 1. Well equipped interior

Freezer, dividers, wire basket, door tray – it's all there

### 2. Compact, light & efficient compressor

Offering unparalleled energy efficiency and installation capabilities.

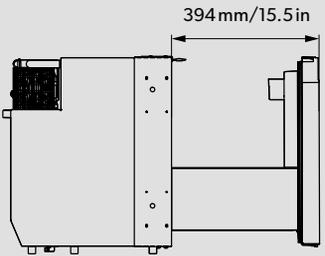

### 3. Touch control panel

Flush-mounted inside the cabinet, with integrated LED light bar.

From 0.22kw  
per 24 Hour

# NRX ACCESSORIES

## Dometic DPS-R 135 Adapter

Introducing our latest accessory for your on-water adventures: the Dometic DPS-R 135 Power Adapter. Say goodbye to limitations and hello to convenience with this versatile AC/DC adapter, specially crafted to keep your boating experience smooth sailing and offering unparalleled flexibility to meet your power needs.

Designed to seamlessly integrate with our cutting-edge NRX Series compressor refrigerators but also compatible with other 12/24V appliances, this adapter opens up a world of possibilities. Whether you're out on the open water or docked at your favourite marina, you can now enjoy the convenience of reliable power wherever you go.

Ref. No: 9620013449

### Compact Fit

Offers convenience with its compact size and effortless connection. Its sleek design saves space on your boat while easy-to-use connectors ensure seamless power transitions during marine adventures.

### Smart Back-Up

Automatically reverts to battery power (12/24V) when unplugged, maintaining consistent voltage for reliable appliance utilisation on the go.

### Seamless Switching

Effortlessly transition from battery to mains power (100–240V) for uninterrupted appliance operation on any voyage.

## Dometic DPS-R 135

Refrigeration Power Adapter

MODEL	DPS-R 135
Input voltage	100/240 V AC & 12/24 V DC
Output voltage	27 V
Output current	5 A
Input frequency	50/60 Hz
Priority circuit (Integrated)	Yes
Energy efficiency	> 88 %
Continuous power 25°C	135 W
Operating temperature	-10 °C to +43 °C
Weight	0.6 kg
Dimensions (W × H × D)	32 × 100 × 110 mm

# DOMETIC'S WORLDWIDE SERVICE NETWORK

## The World's Largest Marine Service Network

Dometic Marine has an extensive global network of dealers and service partners across 100 countries. Whether you are out on a lake or in a larger body of water, Dometic Marine are here to help in the event one of your products becomes faulty.

All Dometic service partners are proficiently trained and equipped with the tools and skills needed to find or fix the perfect onboard solution using existing, newly developed products or a combination of the two. In the event you have a bespoke product, our technical sales engineers will gather your specifications and design a solution that works best for you. The combination allows Dometic to offer hassle-free servicing, installations, and repairs for your Dometic appliances.

Should you require service support, please visit our Service Locator on [Dometic.com](https://www.dometic.com) to find your local service partner. Alternatively, should you have any questions or cannot find what you are looking for, please contact your local Dometic Sales Representative.
